### G vs. GF Installation

LiFT 1x1 can be ordered as either Grid Ceiling Flange (G) or 1/2" Flange (GF). The 1/2" flange (GF) is for mounting the fixture in the center of a tile. The grid ceiling flange (G) is for if you are making a pattern with LiFT and would want to mount this off center. The GF mounting option comes with a grid spanning bracket (as show to the side) that will hold the fixture in the center of the tile.

### Side-by-Side Installation

LiFT has the ability to have 2 fixtures mounted side by side using the same grid. This detail allows LiFT to be installed in a pattern with only the space of the T-bar between the fixtures.

## Voltage

- Some LiFT configurations will not accommodate all voltage options; consult with factory

<b>U</b>	Universal
<b>1</b>	120 volt
<b>2</b>	277 volt
<b>3</b>	347 volt
