# LED Recessed FL Mount Instructions

*LED Module does not need to be removed for installation*

## Step 1:

### Layout/ Dimensions

1. Layout fixtures and blocking locations.
2. Layout and install junction boxes and whip out.
3. Install blocking to structure using rough in dimensions.
4. Install ceiling material.
5. Cut out the fixture/row rough-in.

Cross Section View

**Minimum wall opening = 4"**  
**Recommended wall opening = 4-1/4"**

Cut Out Dimensions

1. This product must be installed in accordance with applicable installation and electrical codes by a professional familiar with the construction and operation of the product.
2. Minimum 90°C supply conductors
3. All electrical connections must be performed by a certified electrician to applicable local and national electrical codes.

4. Fixtures must be mounted directly to structure.
5. The holding strength of AC cables cannot be guaranteed if the cables are damaged in any way.
6. All of Pinnacle's packaging is recyclable with the exception of the straps on the pallets. Please reach out to the factory if you need assistance in recycling any packaging components.

## LED Recessed FL Mount Instructions

*LED Module does not need to be removed for installation*

### Step 2:

#### Fixture Prep

1. Ensure proper support behind fixture (see chart on last page for mounting locations)
2. Using flat thin tool carefully remove Lens so as not to damage lens or fixture.
3. Remove Wire Cover Plate.

### Step 3:

#### Mounting and Power

1. Install Wet rated Conduit fitting (by others).
2. Install fixture using two (2) mounting screws, one (1) at each end of fixture. (screws by others).
3. Make necessary connections between fixture and building power using wet rated flex conduit ensuring all wires are properly matched.
4. Reinstall Wire Cover Plate and lens.

**(Note: If joining fixtures to make a row, all fixtures in row required mounting hardware at both ends of fixture.)**

1. This product must be installed in accordance with applicable installation and electrical codes by a professional familiar with the construction and operation of the product.
2. Minimum 90°C supply conductors
3. All electrical connections must be performed by a certified electrician to applicable local and national electrical codes.

4. Fixtures must be mounted directly to structure.
5. The holding strength of AC cables cannot be guaranteed if the cables are damaged in any way.
6. All of Pinnacle's packaging is recyclable with the exception of the straps on the pallets. Please reach out to the factory if you need assistance in recycling any packaging components.

## Optional Step 4:

### Connecting Fixtures Together

1. Remove Lenses and Wire Cover plates (use flat tool to remove lens).
2. Run wires through the Conduit Nipple and the Conduit Nuts prior to wiring fixtures together.
3. Make necessary wiring connections between fixtures ensuring all wires are properly matched.
4. Slide fixtures together, use Joining Biscuits to align fixtures.
5. Install Alignment Bracket, use to hold Conduit Nipples while tightening fixtures together.
6. Reinstall Wire Cover Plates and Lenses.

## Optional Step 5:

### End Feed

1. Remove Lens and Wire Cover plates (use flat tool to remove lens).
2. Connect Wet Rated 1/2" conduit to end of fixture.
3. Pull wires through and make necessary wire connections.
4. Reinstall wire cover and lens.

1. This product must be installed in accordance with applicable installation and electrical codes by a professional familiar with the construction and operation of the product.
2. Minimum 90°C supply conductors
3. All electrical connections must be performed by a certified electrician to applicable local and national electrical codes.

4. Fixtures must be mounted directly to structure.
5. The holding strength of AC cables cannot be guaranteed if the cables are damaged in any way.
6. All of Pinnacle's packaging is recyclable with the exception of the straps on the pallets. Please reach out to the factory if you need assistance in recycling any packaging components.

# EDGE Wet

LED  
PENDANT MOUNT INSTALLATION

**EDGE**  
EVOLUTION WET

# LED Pendant Mount Instructions

*LED Module does not need to be removed for installation*

## Step 1: Power Mount

1. Install 4-Octagonal Junction boxes to structure at all mounting locations.
2. Install conduit from building power to J-Box.
3. Install crossbar to J-Box.
4. Remove Lens and Wire Cover Plates from fixture. (see back page for opening the lens)
5. Feed slip canopy over pendant and secure pendant to crossbar.
6. Attach Pendant Nut and Gasket Washer to top end of pendant, Teflon Tape the pendant threads, and feed pendant through fixture hole and attach second Conduit Nut inside of fixture.
7. Feed power wired through pendant and out leaving 12" for wiring.
8. Make necessary connections between fixture and building wires.

## Step 2: Non Power Mount

1. Install 4-Octagonal Junction boxes to structure at all mounting locations.
2. Install conduit from building power to J-Box.
3. Install crossbar to J-Box.
4. Feed slip canopy over pendant and secure pendant to crossbar.
5. Attach Pendant Nut and Gasket Washer to top end of pendant, teflon tape the pendant threads, and feed pendant through fixture hole and attach second Conduit Nut inside of fixture.
6. Reinstall Wire Cover Plates and Lens.

**\* This applies to both  
Power and Non Power  
mounting locations**

1. This product must be installed in accordance with applicable installation and electrical codes by a professional familiar with the construction and operation of the product.
2. Minimum 90°C supply conductors
3. All electrical connections must be performed by a certified electrician to applicable local and national electrical codes.

4. Fixtures must be mounted directly to structure.
5. The holding strength of AC cables cannot be guaranteed if the cables are damaged in any way.

LED  
WALL MOUNT INSTALLATION

*LED Module does not need to be removed for installation*

## Step 1: Wall Bracket

1. Attach wall side bracket to structure via mounting hardware (by others).
2. If power side, mount bracket in line with 2x4 junction box (by others).
3. Bring power in through junction box.
4. Follow mount spacing on page 3 for additional mounting points.

**(Note: Powerside fixture bracket will have gasket.)**

## Step 2: Power Mount

1. Place fixture in wiring position by lifting fixture into place and having Pem on wall side bracket slide into Pem Channel on fixture side bracket, once in fixture can swing down to allow for hands free wiring.
2. To power fixture, attach building power to fixture power wires using push nuts.
3. Recess connections into junction box. Making sure no wires are between bracket and gasket.
4. Make necessary adjustments laterally prior to tightening wall mount screw.

**\* hands free \*  
wiring position**

**on left side of fixture.**

EDGE Wet LENS  
DETAIL

## Lens Installation

1. Begin at one end of the lens and squeeze sides to allow it to flex.
2. Insert end of lens into place. Lens will snap into place when installed properly.
3. Slowly insert rest of lens down the length of the fixture

## Lens Removal

1. Insert a rigid object approx. Such as a putty knife, into the edge between the lens and the fixture side about one inch from end.
2. Using said object, gently pry lens away from fixture until it is released from the mounting edge.
3. Once the section is released, start at that end of the fixture and pull the lens out of the fixture.

**Note: Low temperatures can effect the lens material, making it brittle. Please allow the lenses to warm to room temperature before installation.**
