ARCHITECTURAL LIGHTING®

Giving Ceilings a Fresh LiFT

LiFT v3 brings next-generation performance to Pinnacle's popular luminous recessed series. Featuring clean regressed lensing, a versatile range of six sizes, and remarkably uniform illumination, it's designed to create ambient lighting that feels expansive, architectural, and perfectly tailored to today's modern interiors.

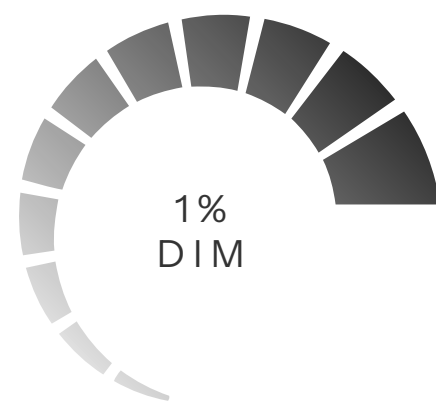

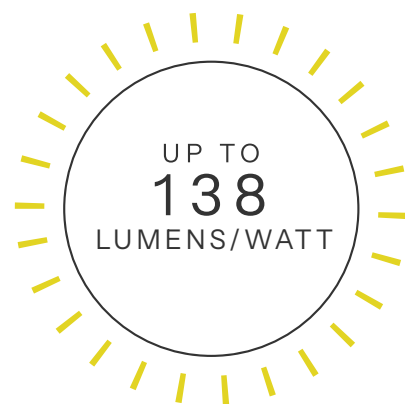

LiFT 2x2 and 4x4 sizes shown

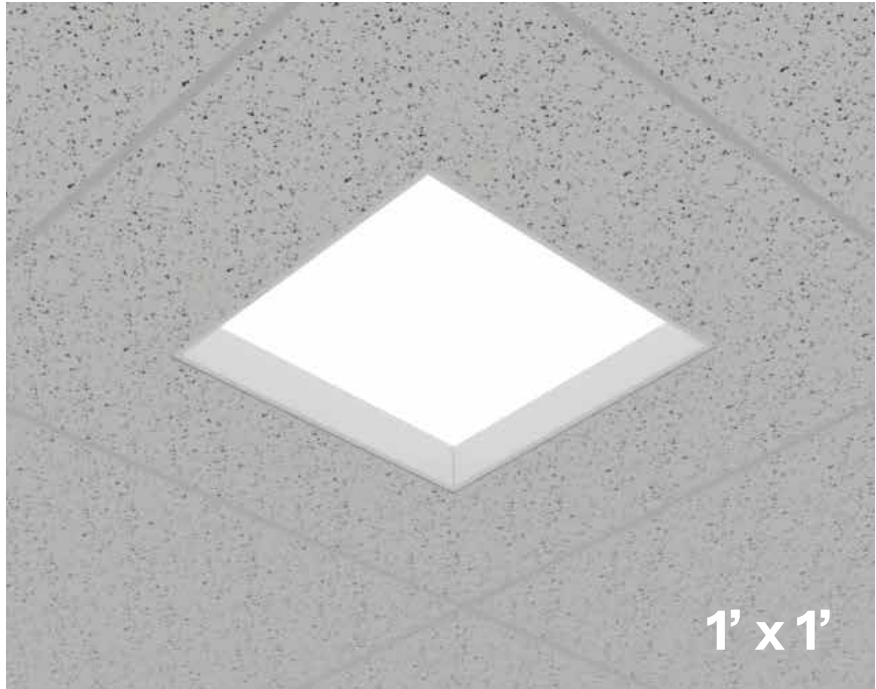

Simple is Powerful

With its crisp regressed lens and seamless transitions, LiFT delivers soft, even illumination that feels architectural and intentional. Harmonious proportions and a fully luminous design make it ideal for bold pattern clusters or classic grid layouts.

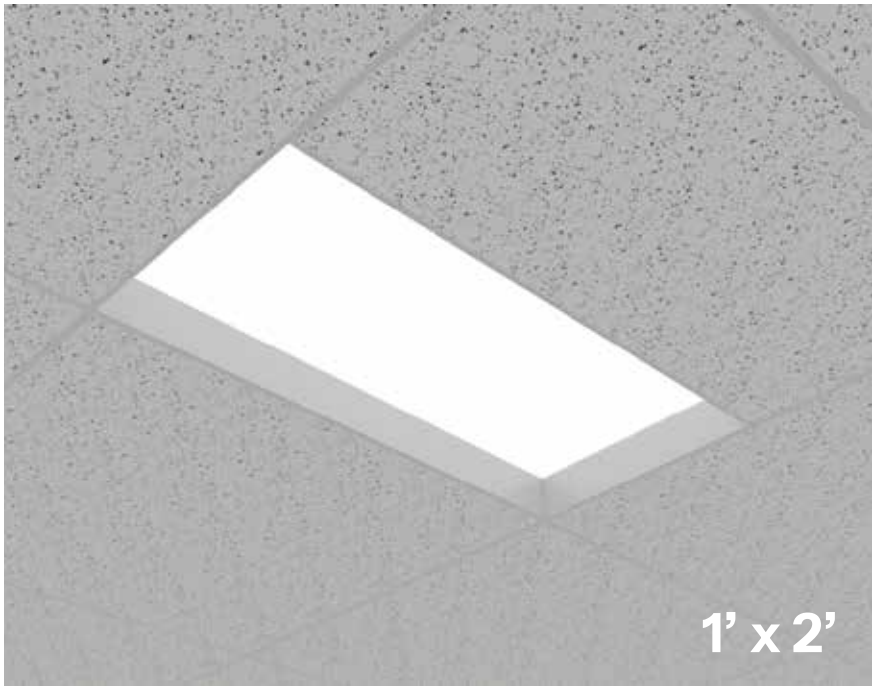

Behind the lens, LiFT is engineered for high performance and visual comfort, offering excellent efficiency, 90+ CRI, and available with Tunable White (2700K-6500K) for projects that require dynamic lighting throughout the day.

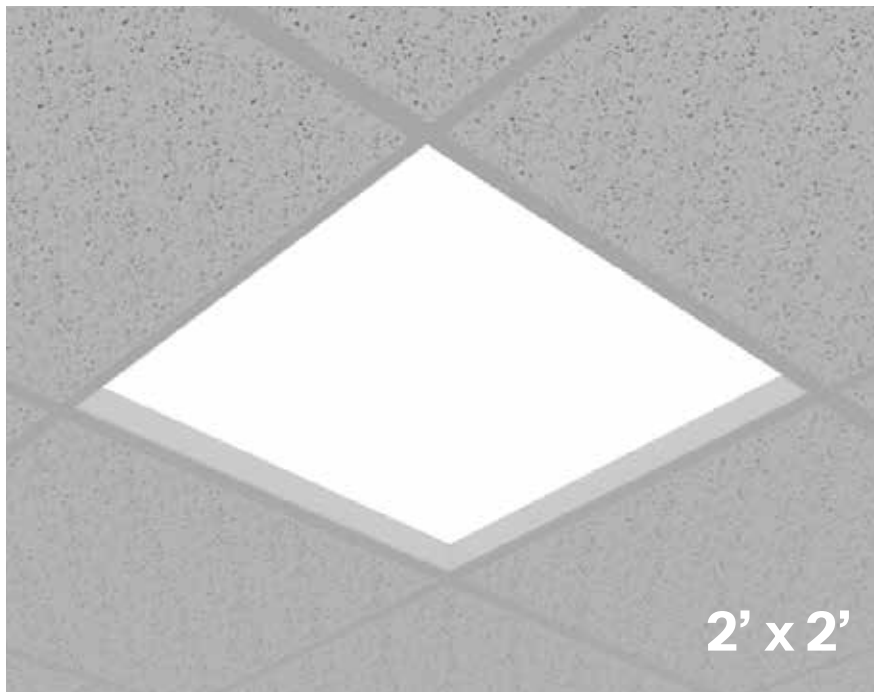

High Output - Up to 23,000 lumens delivered in 4x4

2' x 2'

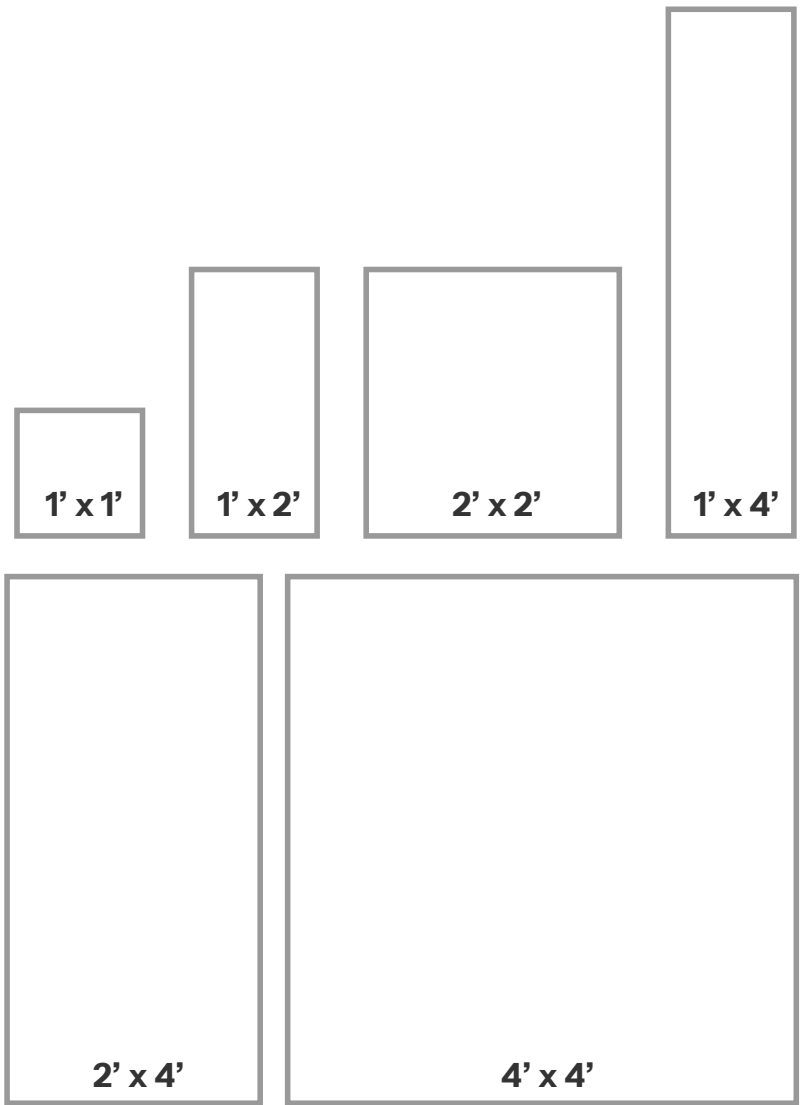

1' x 4'

4' x 4'

2' x 4'

So Many Sizes, One Perfect Fit

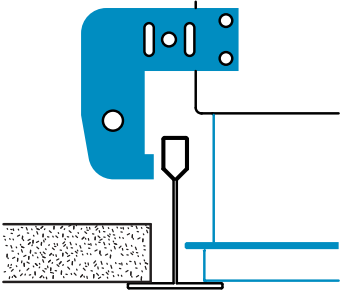

From the compact 1×1 size to the stunningly large 4×4, LiFT offers the flexibility to realize design visions with precision and ease.

Three mounting options accommodate a range of ceiling types: Grid, Flanged Drywall, and Spackle Flange—a premium solution that creates a smooth, integrated transition between fixture and drywall.

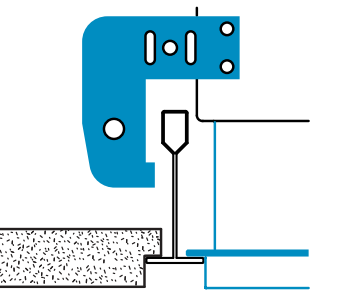

Whether crafting intricate ceiling patterns or clean, classic layouts, LiFT is a powerful lighting solution that supports a wide range of design intents.
