

Say hello. The new Edge 1 Veil Louver.

P I N N A C L E  
ARCHITECTURAL LIGHTING

# Only thing glaring are the advantages.

Edge 1 Veil Louver from Pinnacle. The optics of visual comfort.

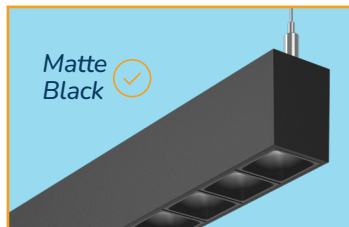

## The comfort upgrade you've long sought after has arrived.

Command optical control with precision and perfection, thanks to the Edge 1 Veil Louver—the latest addition to the Edge 1 and Edge Mini portfolio. You see the space, not the source. Designers and occupants alike will appreciate lighting that feels comfortable day after day. Better focus, fewer distractions, and a calmer visual field are theirs.

### Advantage: Edge 1 Veil Louver

- Anticipate greater comfort by shielding light to minimize glare in a narrow aperture design.
- Find the accent or ambient illumination you desire through four beam spread options.
- Design with intent by mixing Veil Louver, lensed, and blank sections within a single continuous run.
- Set the tone with individuals, continuous linear runs or patterns using Edge Hubs.
- Control lighting with independent uplight/downlight control.
- Supports LEED and WELL building glare criteria.

Multiple louver finishes. All with different and purposeful intentions.

#### Made to hide.

Absorbs brightness to quietly conceal light source yet emphasizes light itself. Ideal for hospitality, museums and high-end workplaces.

#### Made to harmonize.

Purity and softness to promote calm consistently. Ideal for open offices, education and public spaces.

#### Made to highlight.

Brings a subtle metallic spark that adds dimension without distraction. Ideal to pair with warm woods and soft neutrals.
